

**Scheme for Timely Reporting of Estimates of Area and Production of Principal Crops.**

**(TRS)**

The objective of this scheme is to obtain estimates of area of principal crops, in each season, with break-up of area under irrigated/unirrigated and traditional /high yielding varieties of crops on the basis of priority enumeration conducted on the basis of random sample of 20% of villages by a specific date. The estimates are used for generating advance estimates of production of principal crops. This component is being implemented in 16 land record States and also Union Territories of Delhi and Pondicherry.
